2654

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on Mar 12, 2002
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-6, 8-11, 13-16, 18-23, and 25-27 is/are pending in the application.
- 4a) Of the above, claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-6, 8-11, 13-16, 18-23, and 25-27 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claims _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
*See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s). _____ 6) ☐ Other:

Art Unit: 2654

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6, 8, 9, 13-16, 18-21, 25 and 26 are rejected under 35

U.S.C. 102(b) as being anticipated by Lee (5,504,805).

As to claim 1, Lee teaches a method of processing a voice message, the method comprising the steps of:

performing voice recognition on a portion of the voice message to generate textual representation of the voice message (Col.2, lines 12-30);

extracting and determining position of spoken telephone number in the textual representation of the voice message (Col.2, lines 12-30; Fig.2);

playing the extracted telephone number (Col.2, lines 35-38); and

automatically dialing the extracted telephone number (Col.2, lines 45-52).

As to claims 2-3, Lee teaches wherein the spoken number includes a plurality

Art Unit: 2654

of telephone numbers in the voice message and occurrence position includes start position of a leading digit (Fig.2)

As to claims 4 and 5, Lee teaches enabling the user to control the message playback by receiving user's input during play back (Figs.3-6)

As to claim 6, Lee teaches displaying a portion of textual representation of the message (Col.2, lines 35-37).

As to claim 9, Lee teaches where the telephone numbers extracted are spoken telephone number (Col.1, lines 35-44; Col.2, lines 45-52).

As to claim 13, Lee teaches an apparatus, comprising:

a memory for storing voice messages; and

a program configured to perform voice recognition on a portion of the voice message to generate textual representation of the voice message, detecting a position of spoken numbers in the voice message, to determine a playback start position of the detected number and to play the telephone number and wherein the process repeated for subsequently extracted telephone numbers (Figs 1, 2, 6).

As to claims 14 and 15, Lee teaches wherein the spoken number includes a

Art Unit: 2654

plurality of telephone numbers in the voice message and occurrence position includes start position of a leading digit (Fig.2).

As to claim 16, Lee teaches enabling the user to control the message playback by receiving user's input during play back (Figs.3-6)

As to claim 18, Lee teaches displaying a portion of textual representation of the message (Col.2, lines 35-37).

As to claim 8, 19 and 20, Lee teaches where the extracted numbers are automatically dialed at the request of the user (Col.2, lines 35-52).

As to claim 21, Lee teaches where the telephone numbers extracted are spoken telephone number (Col.1, lines 35-44; Col.2, lines 45-52).

As to claim 25, Lee teaches a program product, comprising:
a program/software configured to perform voice recognition on a portion of voice message to generate a textual representation of the voice message, including extracting spoken telephone numbers in a voice message and detecting starting position of the spoken number in the text, to determine playback position of the number and to playback the message; and

a signal bearing/storing medium for bearing the software (Figs.1-6).

Art Unit: 2654

As to claim 26, Lee teaches where the software storage medium includes one of a transmission medium and recording medium (Fig.1).

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 10-11, 22- 23 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Eting et al. (US 5,651,056; "Eting").

As to claim 10, Eting teaches a method of processing a voice message, the method comprising:

performing voice recognition on a portion of the voice message to detect/recognize spoken telephone numbers in the voice message (Fig.7), including the step of confirming the detected telephone number (Col.14, lines 18-35); and automatically dialing the detected spoken telephone numbers (Fig.8A).

As to claim 11, Eting teaches wherein the automatically dialing of the recognized numbers is performed in response to user input (Col.13, lines 50-56; Fig.6, 8A).

Art Unit: 2654

As to claim 22, Eting teaches an apparatus, comprising:
a memory for storing voice message; and
a program configured to perform voice recognition on the portion of the voice message to detect spoken numbers, and to automatically dial the detected spoken numbers (Figs.2A, 4, 7 and 8).

As to claim 23, Eting teaches wherein the program is configured to automatically dial the recognized numbers in response to user input (Col.13, lines 50-56; Fig.6, 8A).

As to claim 27, Eting teaches a program product, comprising:
a program configured to perform voice recognition on a voice message to detect spoken numbers in the voice message and to automatically dial the detected spoken numbers after confirmation (Fig.7 and 8); and
a signal bearing/storage medium bearing the program (Fig.3, numeral 430).

Response to Arguments

5. Applicant's arguments filed on 3/12/2002 have been fully considered but they are not persuasive. Argument regarding the Eting patent, the Eting's art is related to recognizing spoken telephone numbers during telephone conversation as well as

Art Unit: 2654

from messages left by the calling party, for the purpose of generating the recognized phone number during message playback and automatic dialing of said the telephone number. Eting teaches where the voice recognition comprises conversation content recognizer for detecting telephone numbers in the contents of conversation/voice-message, indicating the numbers that are recognized and stored separately for retrieval are spoken "telephone numbers" (with their required format). Eting also teaches where messages other than telephone numbers are stored separately in a voice message map and indexed for dial purpose (Fig.4, 550). Therefore the Examiner submits that the claimed invention is anticipated by the teaching of Eting. Regarding claims 1-6, 8, 9, 13-16, 18-21, 25 and 26 new ground of rejection is made as the previous patent is owned by the same assignee.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory

Art Unit: 2654

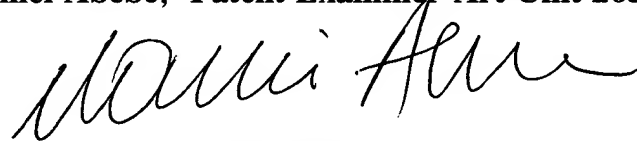

action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communication from the examiner should be directed to Daniel Abebe whose telephone number is (703) 308-5543. The examiner can normally be reached on Monday through Friday from 8:00 a.m. to 4:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marsha D. Banks-Harold, can be reached at (703) 305-4379. The facsimile phone number for this group is (703)872-9314.

Any inquiry of general nature or relating to the status of this application should be directed to the Technology Center 2600 Customer Service office whose telephone number is (703) 306-0377
